Title: Pure Bred Miniature Blue Heeler Male (1)
Breed: Australian Cattle Dog
Age: 6 Week(s)
Gender: Male
Price: \$ 500
Description: THIS BOY IS A KNOCKOUT! When he looks you in the eye, your heart just seems to melt. It must be the shape of his right eye patch, which makes him look so exotic. He will be a little lighter blue with THE most beautiful dapples on his back legs and belly, as well as the white in his forehead and the white in his tail. He is a real go-getter, probably the most inquisitive one of the litter. When he is full grown he should weigh about 40 pounds. Also, he is very happy and loves life!

THIS PUP'S MOTHER BELLA, is an exceptional bitch. Her temperament, intelligence, conformation, coloring, markings, loyalty, and desire to please are all near perfect. She is three years old (born June 2016), weighed 38 pounds before puppies, and this is her first litter. The father (I have no picture) weighs about 42 pounds and is a lighter blue than Bella. He is a full time working dog – herding cattle and horses daily. I chose him to mate with Bella because he, too, is a very outstanding Blue Heeler. He is almost the same size, his coloring and markings are beautiful, has great conformation, and

his temperament, like Bella's, is ideal.

WE FIRST STARTED RAISING BLUE HEELERS in the mid 1970s when my late husband and I fell in love with the breed, then called Queensland Blue Heelers. All my puppies are descended from Posey, the best bitch ever. She is extremely intelligent, beautiful, intensely loyal, and weighs in at 28 pounds. Watching her sprint and do acrobatics is like watching a symphony in motion. She is truly an original, old-fashioned small Blue Heeler. As for the puppies, for the first two weeks the pup nursery is in my large country kitchen. Then they graduate to a 10' by 30' deck, with daily jaunts in the yard for wrestling in the grass.
